

PACK-ENGINEERING

Simple Solutions
for Complex Problems

Drum Tipper

Reduces ergonomic risk factors associated with manually dumping drums.

Variable Height Drum Tipper

Lifts and tips drums at multiple heights.

Drum Inverter

Allows operators to lift and position drums above tall applications.

Material Transfer Station

Improves operator safety during the material transfer and weighing process.

Drum Mover

Ergonomically lifts and moves drums.

Bin Tipper

Ergonomically tips bins for cleaning and valve changeout.

Power Tug

Powered GMP heavy equipment mover.

Ventilation Sleeve

Localized dust and vapor control at the point of product transfer.

Mobile Ventilation Sleeve

Portable EHS Ventilation Sleeve with adjustable height.

Large Diameter Ventilation Sleeve

Containment solution for large diameter openings.

Product Screener

Provides dust containment during the screening process.

Manway Nitrogen Purge Hopper

Maintains low oxygen levels while charging solids through large vessel ports.

Small Port Nitrogen Purge Hopper

Maintains low oxygen levels while charging solids through small vessel ports.

Dual Hopper Purge System

Dual hopper purge system for the injection molding process.

PACKAGING SOLUTIONS FOR PHARMA - HEALTHCARE - FOOD - COSMETIC
